Med/Drug^ Overdose ED Visits by Med/Drug Class
Last 12 Months: Duplin County

- Other/Unknown substance
- Unspecified Narcotics (opiate or narcotic related)
- Commonly Prescribed Opioids
- Fentanyl/ Analogs^ (less than 85% ethnicity data available)
- Benzodiazepines
- Stimulant

^Report is based on initial encounter, unintentional and undetermined intent cases only, for ICD10CM overdose codes of drugs and medicaments with dependency potential within T40, T42, T43, T50.7, and T50.9.

Note: Report is restricted to N.C. residents between the ages 15 to 65 years. Drug classes shown are not mutually exclusive, a person may have more than one drug overdose diagnosis code, therefore, a person may be represented in multiple lines in the graph above. *Data is provisional; YTD (Year to date). NC DETECT is North Carolina’s statewide syndromic surveillance system. There may be data quality issues affecting our counts.
