

# Medication and Drug Overdose in Mecklenburg County

# Technical Notes

- The fatality data provided here are part of the Vital Registry System of the State Center for Health Statistics (SCHS) and have been used to track and monitor the drug overdose burden in NC using ICD-10 codes. Surveillance using ICD-10 codes relies on the immense efforts of the NC Office of the Chief Medical Examiner (OCME) to investigate overdose deaths in NC.
- Individual ICD-10 codes do not exist for each specific substance involved in overdose. Other Synthetic Narcotics (T40.4) includes several substances but the majority of deaths with this code involved fentanyl. Similarly, psychostimulants with abuse potential (T43.6) is used for methamphetamine surveillance.
- Counts and rates are limited to NC residents. When calculating rates, higher counts provide greater reliability, therefore years are often grouped. Use caution when interpreting rates for counts from 5 - 9. Counts from 1 - 4 are considered unstable and therefore have a low reliability; rates are not calculated for these counts.
- Population estimates for 2021 are subject to change.
- Speaking and technical notes should be read prior to using.

 Analysis by Injury Epidemiology and Surveillance Unit

\* Non-Hispanic  
 \*\* American Indian/Alaskan Native

# Rate of Medication & Drug Overdose Deaths, All Intent

Per 100,000 North Carolina Residents, 2017-2021

**All Intent Medication/Drug Overdose Deaths,  
Rate per 100,000 NC Residents, 2017-2021**

**Rate of Medication/Drug Overdose Deaths per 100,000  
North Carolina Residents, 2017-2021**

Mecklenburg	19.4
Statewide	27.6

**Technical Notes:** Rates are per 100,000 NC residents; All intent medication and drug poisoning: X40-X44, X60-X64, Y10-Y14, X85  
**Source:** Deaths-NC State Center for Health Statistics, Vital Statistics; Population-National Center for Health Statistics  
 Analysis by Injury Epidemiology and Surveillance Unit

# Rate of Opioid Overdose Deaths, All Intent

Per 100,000 North Carolina Residents, 2017-2021

All Intent Opioid Overdose Deaths,  
Rate per 100,000 NC Residents, 2017-2021

Rate of Opioid Overdose Deaths per 100,000 North Carolina Residents, 2017-2021	
Mecklenburg	15.8
Statewide	22.7

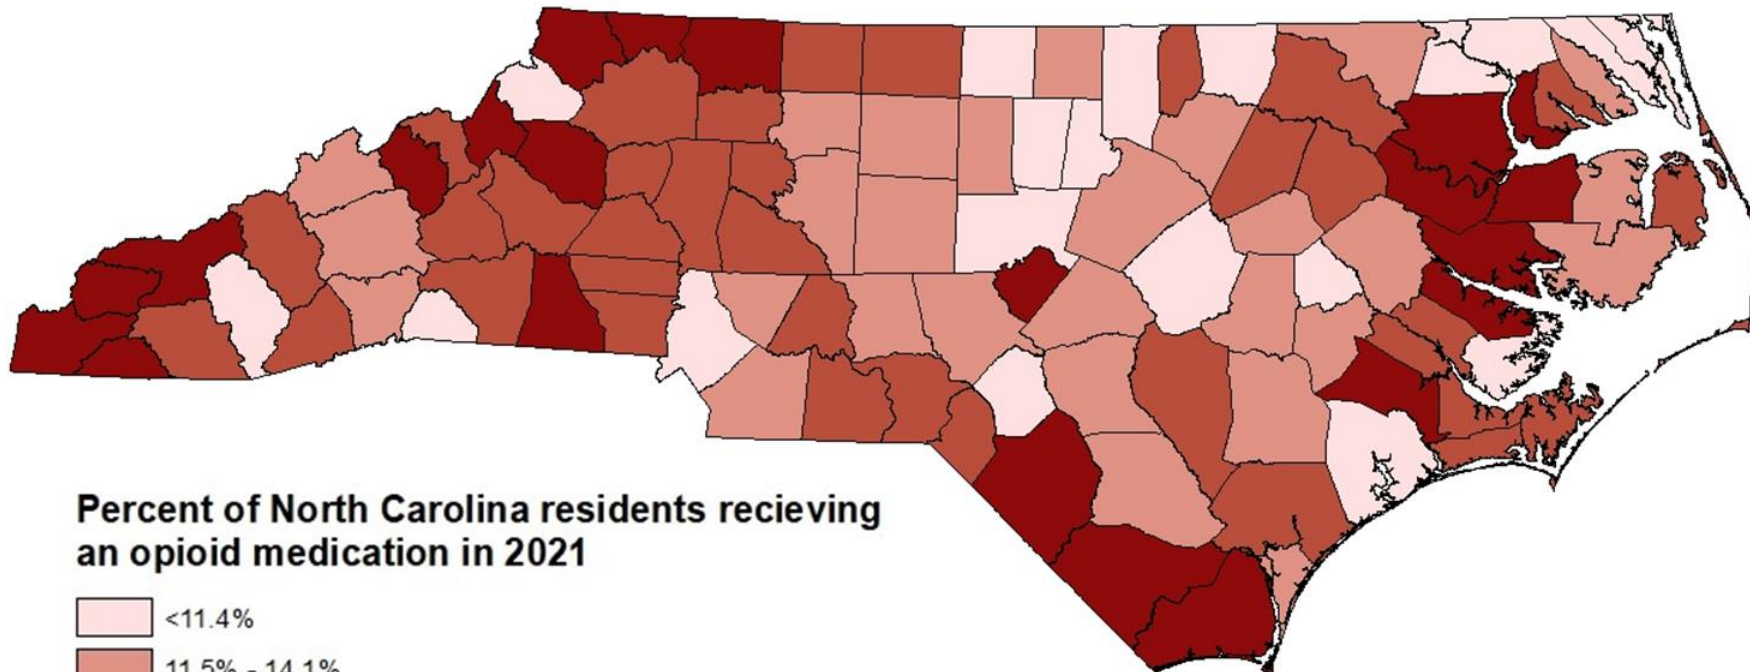

**Technical Notes:** Rates are per 100,000 N.C. residents, Unintentional medication and drug poisoning: X40-X44 and any mention of T40.0 (opium), T40.2 (Other Opioids), T40.3 (Methadone), T40.4 (Other synthetic opioid) and/or T40.6 (Other/unspecified narcotics)

Analysis by Injury Epidemiology and Surveillance Unit

# One Year's Estimated Total Lifetime Costs

Medical\* and Statistical Life\*\* Loss from Medication & Drug Overdose Deaths, 2021

	Mecklenburg County	Statewide
Total Medical Costs*	\$1,846,240	\$24,535,913
Total Statistical Life** Loss	\$2,661,071,797	\$35,304,800,000
<b>Combined Costs</b>	<b>\$2,662,918,037</b>	<b>\$35,325,130,000</b>
<b>Cost per capita</b>	<b>\$2,359</b>	<b>\$3,332</b>

**Technical Note:** These estimates only include fatalities and do not include additional costs associated with non-fatal overdoses, treatment, recovery, and other costs associated with this epidemic.

\*Medical costs refer to medical care associated with the fatal event, including health care and lost productivity.

\*\*Value of statistical life refers to the estimated monetized quality of life lost and assesses underlying impacts on life lost.
