EMS Suspected Opioid Overdose Encounters by Race/Ethnicity and Age Group

Year to date (Jun 2023), 46 of the 53 suspected opioid overdose encounters in Orange County received naloxone, and 36 (78%) had an improved response to naloxone.

*EMS data are provisional and should not be considered final. All “EMS Opioid OD” counts reflect suspected opioid overdose encounters, based on the ‘Opioid Overdose’ EMS Indicator developed by NC DETECT. Population Data: U.S. Census Bureau, http://quickfacts.census.gov. For training on NCDETECT, contact Amy Ising, ising@ad.unc.edu.

轺 Overdose percentages that exceed population estimates within a subgroup indicate a population that may be disproportionately impacted.

Note: NH (Non-hispanic);
