†Against Medical Advice

Note: Counts based on North Carolina Disease Event Tracking and Epidemiologic Collection Tool (NC DETECT) opioid overdose indicator case definition: patients >11 years old, AND encounters with opioid-related primary or secondary impression AND documented administration of naloxone OR naloxone AND unresponsive keyterms in the narrative.

Year to date (Jun 2023), 102 of the 111 suspected opioid overdose encounters in Randolph County received naloxone, and 99 (97%) had an improved response to naloxone.

*EMS data are provisional and should not be considered final. All "EMS Opioid OD" counts reflect suspected opioid overdose encounters, based on the ‘Opioid Overdose’ EMS Indicator developed by NC DETECT. Population Data-U.S. Census Bureau, http://quickfacts.census.gov. For training on NCDETECT, contact Amy Ising, ising@ad.unc.edu.

Note: NH (Non-hispanic);

Overdose percentages that exceed population estimates within a subgroup indicate a population that may be disproportionately impacted.
