Opioid Overdose ED Visits by Age Group

- **<25**
- **25-34**
- **35-44**
- **45-54**
- **55-64**
- **65+**

Notes:
- NC DETECT is North Carolina’s statewide syndromic surveillance system. There may be data quality issues affecting our counts; counties with <10 cases may not be true lack of opioid overdose cases but data quality issues; additionally, some hospitals use non-specific poisoning codes rather than specific opioid poisoning codes. For training on NCDETECT, contact Amy Ising, ising@ad.unc.edu.
- Counts based on ICD-10-CM diagnosis code of an opioid overdose: T40.0 (Opium), T40.1 (Heroin), T40.2 (Other Opioids), T40.3 (Methadone), and T40.4 (Other Synthetic Narcotics), and T40.6 (Other and Unspecified Narcotics).
