**Note**: NC DETECT is North Carolina’s statewide syndromic surveillance system. There may be data quality issues affecting our counts; counties with <10 cases may not be true lack of opioid overdose cases but data quality issues; additionally, some hospitals use non-specific poisoning codes rather than specific opioid poisoning codes. For training on NC DETECT, contact Amy Ising, ising@ad.unc.edu.

Counts based on ICD-10-CM diagnosis code of an opioid overdose: **T40.0 (Opium)**, **T40.1 (Heroin)**, **T40.2 (Other Opioids)**, **T40.3 (Methadone)**, and **T40.4 (Other Synthetic Narcotics)**, and **T40.6 (Other and Unspecified Narcotics)**.
