Opioid Overdose ED Visits by Age Group  

- Durham population estimate  
- Durham opioid overdose ED visits last 12 months  

- <25  
- 25-34  
- 35-44  
- 45-54  
- 55-64  
- 65+  

Note: NC DETECT is North Carolina’s statewide syndromic surveillance system. There may be data quality issues affecting our counts: counties with <10 cases may not be true lack of opioid overdose cases but data quality issues; additionally, some hospitals use non-specific poisoning codes rather than specific opioid poisoning codes. For questions contact SubstanceUseData@dhhs.nc.gov
