Moore County, 2021-2022*

Opioid Overdose ED Visits by Race Ethnicity

Opioid Overdose ED Visits in Moore County for 2022* YTD

compared to 20 from Jan to Apr 2021*

Source: NC DETECT; Data Source: ED; Custom Event: Overdose:
Opioid Overdose V.2 (ICD-9/10-CM)

Note: Non-hispanic, except when ethnicity data are missing or incomplete
(less than 85% ethnicity data available); if ethnicity is missing, race categories include both Hispanic and Non-Hispanic. AI/AN (American Indian/ Alaskan Native).

Note: NC DETECT is North Carolina’s statewide syndromic surveillance system. There may be data quality issues affecting our counts; counties with <10 cases may not be true lack of opioid overdose cases but data quality issues; additionally, some hospitals use non-specific poisoning codes rather than specific opioid poisoning codes. For training on NCDETECT, contact Amy Ising, ising@ad.unc.edu.

Counts based on ICD-10-CM diagnosis code of an opioid overdose: T40.0 (Opium), T40.1 (Heroin), T40.2 (Other Opioids), T40.3 (Methadone), and T40.4 (Other Synthetic Narcotics), and T40.6 (Other and Unspecified Narcotics).

YTD: Year to date; *Provisional Data: 2020-2021 ED Visits
•Non-hispanic, except when ethnicity data are missing or incomplete
(less than 85% ethnicity data available); if ethnicity is missing, race categories include both Hispanic and Non-Hispanic. AI/AN (American Indian/ Alaskan Native).

Note: 2020-2021 ED visit data is provisional; For case definitions, go to

There are known data quality gaps for May-June 2021 that may be impacting the shown trends. Interpret the data for these months with caution.
