

ALL OPIOID OVERDOSE ED VISITS: NORTH CAROLINA, DECEMBER 2020*

658 All opioid overdose ED visits: December 2020*
 Compared to **579** December 2019

Data Source: NCDETECT: ED; Custom Event: Overdose: Opioid Overdose V.2 (ICD-9/10-CM)

The highest rates of visits (≥ 10) per 100,000 residents occurred in:

Burke (23.2), Randolph (16), Carteret (15.8), Craven (15.5), and Catawba (13.2) counties.

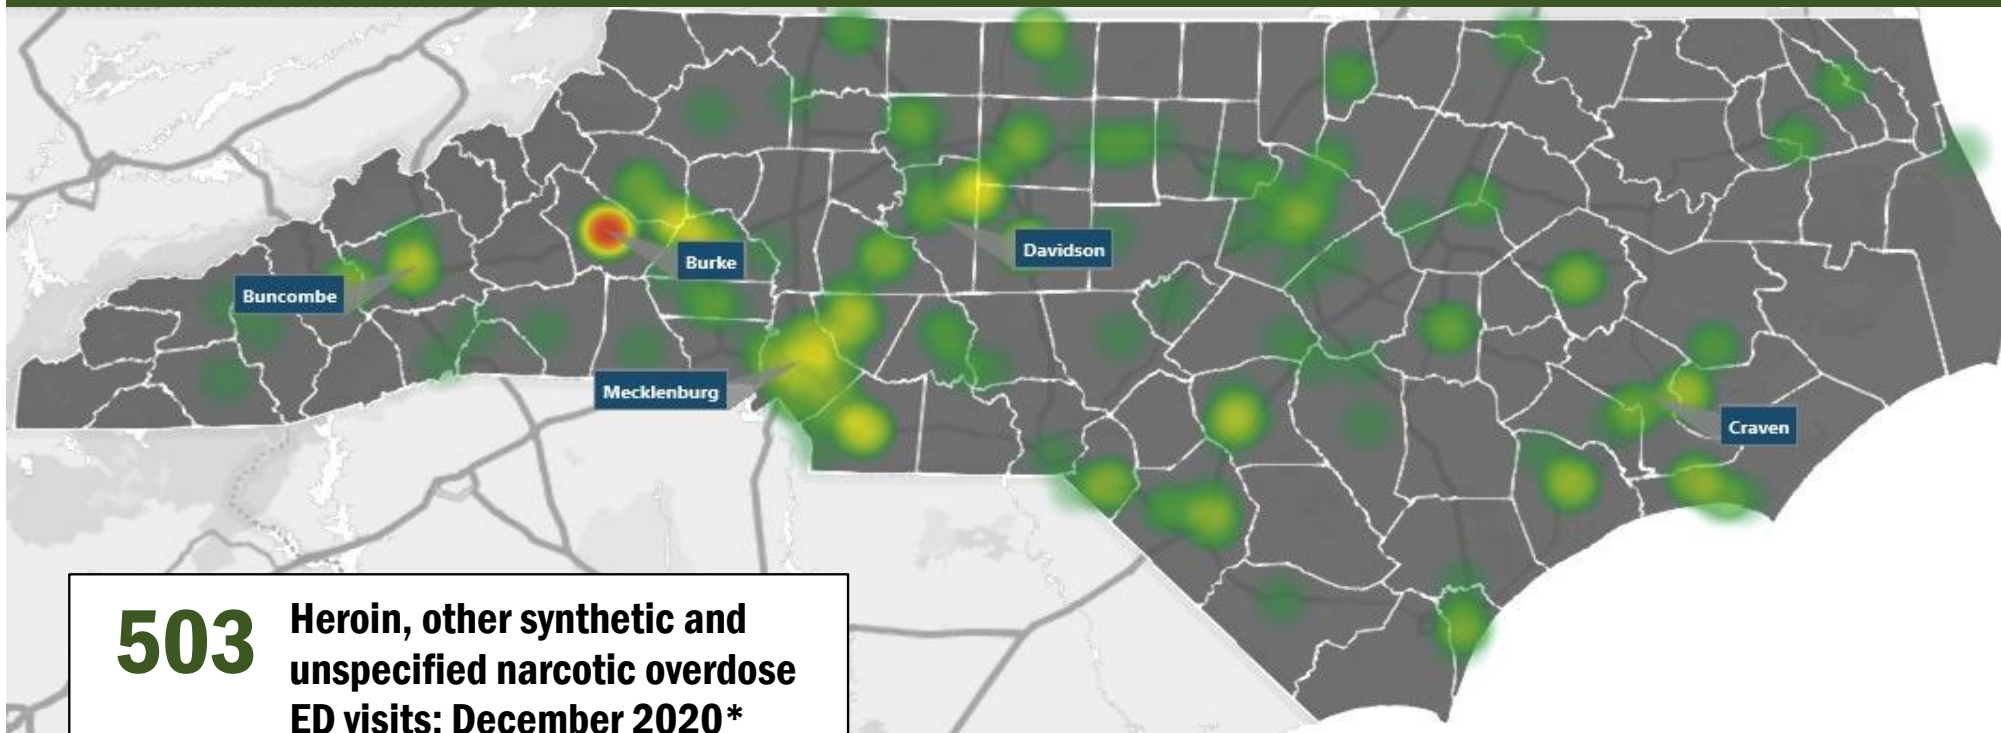

Note: NH(Non Hispanic). Counts based on diagnosis (ICD-9/10-CM code) of an opioid overdose of any intent (accidental, intentional, assault, and undetermined) for North Carolina residents.*Emergency department visit data from NC DETECT are provisional and should not be considered final. There may be data quality issues affecting our counts: counties with <10 cases may not be true lack of opioid overdose cases but data quality issues; additionally, some hospitals use non-specific poisoning codes rather than specific opioid poisoning codes.
