The North Carolina Violent Death Reporting System (NC-VDRS) is a CDC-funded statewide surveillance system that collects detailed information on deaths that occur in North Carolina resulting from violence: homicide, suicide, unintentional firearm deaths, legal intervention and deaths for which intent could not be determined. NC-VDRS is a multi-source system that gathers information from death certificates, medical examiner reports and law enforcement reports. The goal of this system is to aid researchers, legislators, and community interest groups in the development of public health prevention strategies to reduce violent deaths. NC-VDRS began collecting data in January 2004. This document summarizes all deaths from violence among non-Hispanic (NH) American Indian residents for the years 2009-2018.

**Violent Deaths Among American Indian Residents in North Carolina: 2009-2018**

The North Carolina Violent Death Reporting System (NC-VDRS) is a CDC-funded statewide surveillance system that collects detailed information on deaths that occur in North Carolina resulting from violence: homicide, suicide, unintentional firearm deaths, legal intervention and deaths for which intent could not be determined. NC-VDRS is a multi-source system that gathers information from death certificates, medical examiner reports and law enforcement reports. The goal of this system is to aid researchers, legislators, and community interest groups in the development of public health prevention strategies to reduce violent deaths. NC-VDRS began collecting data in January 2004. This document summarizes all deaths from violence among non-Hispanic (NH) American Indian residents for the years 2009-2018.

**Violent Death Rate by Race, NC-VDRS, 2009-2018**

For the year 2018, there were 123,402 NH American Indians living in North Carolina, accounting for 1.2% of the state's population.

NH American Indians had the highest rate of violent death by race in North Carolina for the years 2009-2018 (29.1 per 100,000 population).

**Manner of Death: NC-VDRS**

NH American Indian Violent Deaths, 2009-2018

- For the year 2018, there were 123,402 NH American Indians living in North Carolina, accounting for 1.2% of the state's population.

- NH American Indians had the highest rate of violent death by race in North Carolina for the years 2009-2018 (29.1 per 100,000 population).

**Manner of Death by Race: NC-VDRS, 2009-2018**

- NH American Indians accounted for 3.3% of all homicides and 1.1% of all suicides, across all racial groups in North Carolina from 2009 to 2018.

- In contrast, 55.9% of all homicide victims were NH Black and 86.5% of all suicide victims were NH white from 2009 to 2018.
The North Carolina Violent Death Reporting System is supported by Cooperative Agreement 5NU17/CE002613-05-00 from the Centers for Disease Control and Prevention (CDC).
