VIOLENT DEATH IN NORTH CAROLINA: BUNCOMBE COUNTY INCIDENTS, 2011-2020

The North Carolina Violent Death Reporting System (NC-VDRS) is a CDC-funded statewide surveillance system that collects detailed information on violent deaths that occur in North Carolina, including: homicide, suicide, unintentional firearm deaths, legal intervention, and deaths of undetermined intent. NC-VDRS triangulates information from death certificates, medical examiner reports, and law enforcement reports to understand and aid in the prevention of violent deaths. Data reported in this document are based on the death occurred rather than county of residence. For more information, please visit https://www.injuryfreenc.ncdhhs.gov/About/ncVDRS.htm.

1 The occurrent ratio is used instead of the rate. This statistic is derived from the total number of violent deaths resulting from injuries in a specified geographic region divided by the number of residents in the region.

**Manner of Death: Buncombe County, NC: NC-VDRS, 2011-2020***

- Suicide: 77%
- Homicide: 19%
- Unintentional Firearm: 1%
- Legal Intervention: 1%
- Undetermined Intent: 4%

*Based on the county of injury occurrence.

- In Buncombe County, the suicide ratio was 3.1 times higher in males than in females, and the homicide ratio was 2.7 times higher in males than in females.

**Manner of Death by Sex: Buncombe County, NC: NC-VDRS, 2011-2020***

- Suicide: Female 10.6, Male 33.3
- Homicide: Female 2.6, Male 6.9
- All Violent Deaths: Female 12.9, Male 38.2

*Rate per 100,000 based on the county of injury occurrence.

**Manner of Death by Race/Ethnicity: Buncombe County, NC: NC-VDRS, 2011-2020***

- Hispanic: 23.4, White NH: 8.2, Black NH: 25.2, American Indian: 25.5, Asian NH: 15.6

*Rate per 100,000 based on the county of injury occurrence. † Rate suppresed, 1-4 deaths. Chart excludes zero deaths of unknown or other race/ethnicity.

- The suicide rate was highest for non-Hispanic (NH) white victims (23.4 suicides per 100,000 population) followed by Hispanic victims (9.3 per 100,000).

- In contrast, the homicide rate was highest among NH Black victims (25.2 per 100,000 population) followed by Hispanic victims (3.6 per 100,000).

- For the years 2011-2020, there were 635 violent deaths from injuries sustained in Buncombe County. Of these 635 deaths, 612 were NC residents (96.4%) and 578 were Buncombe County residents (91.0%).

- There were 486 suicides (76.5%), 118 homicides (18.6%), six unintentional firearm deaths (0.9%), four deaths from legal intervention (0.6%), and 21 deaths of undetermined intent (3.3%).
• Suicides and homicides displayed dissimilar age patterns. Homicide rates peaked among those aged 20-24 with 10.1 homicides per 100,000, while suicide rates peaked among those aged 45-54 with 32.9 suicides per 100,000.

• More than half of homicides (61.0%) and almost half of suicides (46.9%) involved firearms.

• Suspicion of intoxication was reported in 25.4% of homicides and in 22.4% of suicides.

• For homicide incidents where one or more suspects were identified, the relationship of the victim to the suspect was known (current or former spouse/boyfriend/girlfriend, family, friend or acquaintance) more frequently for female (79.4%) than for male (63.1%) victims.
